Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/773,897	Applicant(s) KERR ET AL.	
	Examiner ANABEL M. TON	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 July 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,3,5-7 and 37-50 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 45-50 is/are allowed.
- 6) ☒ Claim(s) 1,3,6,7 and 37-42 is/are rejected.
- 7) ☒ Claim(s) 5,43 and 44 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 6-7, 37-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Reynolds (6,129,440).

- Reynolds a housing , the housing having an outer surface at least a portion of which is illuminable by light transmitted through an inner surface of the housing, wherein the housing encloses at least enclosing various internal components associated with the operation of the computing device; and an indicator assembly (20,40) wherein the indicator assembly_for indicating indicates at least events associated with the computing device-and produces at least a shaped indicator image at a specific small region of an illuminable portion of the outer surface of a housing component that forms an extended outer surface of the housing when activated, and to eliminate the indicator image from the extended outer surface of the housing when deactivated, the indicator assembly including at least one light source capable of emitting light, and a light guide-that directs light emitted from the at least one light source so as to illuminate a small region of an inner surface of the housing adjacent the specific small region of the outer surface of the housing component in

Art Unit: 2875

order to create the shaped indicator image at the specific small region of the extended outer surface of the housing, the area of the shaped indicator image being substantially smaller than the area of the extended surface(figs 4-5, col. 6 lines 29-51).

- the light source includes an LED ;
- The light is made incident on a translucent portion of the housing, the translucent portion transmitting light without permitting objects disposed behind it from being distinctly seen.
- The indicator assembly further includes a mask that blocks light from illuminating all but the specific portion of the housing desired to be illuminated.
- The light guide includes a light pipe for directing light to the part of the housing desired to be illuminated.
- A computing device, comprising: a housing component that forms an extended outer surface of a housing of the computing device; and an indicator configured-that alerts a user to a particular status of the computing device, the indicator including a light source and a light guide both of which are hidden from view and disposed inside the housing of the computing device, the light source when activated emits light into the light guide, the light guide directs the light emitted from the light source so as to illuminate a small portion of the housing component in order to create a shaped indicator image at the extended outer surface of the housing, the area of the shaped indicator image being substantially smaller than the area of the extended surface.

38. (Previously Presented) The computing device as recited in claim 37 wherein the

Art Unit: 2875

extended surface forms substantially the entire front surface of the housing of the computing device(figs 4-5, col. 6 lines 29-51).

- The shaped indicator image is a circle.
- Only the small portion of the housing component is capable of being illuminated when light is made incident on an inner surface of the housing component.
the small portion of the housing component is made illuminable via a recess formed in the inside surface
- Of the housing component, the shape of the recess forming the shape of the shaped indicator image.
- The light source is a remote light source.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Reynolds.

Reynolds discloses the claimed invention except for the recitation of the light source includes a red, green, blue and white LED, the colored LEDs performing color mixing in order to affect the color of the indicator image. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include a red green blue and white LED in the device of Reynolds, since the courts have stated that matters relating to ornamentation only which have no mechanical function cannot be relied upon

Art Unit: 2875

to patentably distinguish the claimed invention from the prior art. *In re Seid*, 161 F.2d 229, 73 USPQ 431 (CCPA 1947). One would have been motivated to modify the device of Reynolds in such a manner for the purpose of providing the device a multitude of colors to select from in order to produce an indication representative of a particular function of the device.

Allowable Subject Matter

5. Claims 45-50 are allowed.
6. Claims 5, 43, 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 07/30/08 have been fully considered but they are not persuasive. Applicant argues the device of Reynolds does not illuminate a portion of the inner surface of the housing in order to create a shaped indicator image at the outer surface of the housing. The examiner disagrees since inherently the light pipe 20b would be illuminated throughout and light loss would provide indirectly illumination to the inner surface of the housing and direct illumination to the inside portion of indicator image 40 from the inside in order to provide light outwardly therefrom. With regards to the limitation "the indicator assembly is not visible from the outer surface of the housing at least when deactivated", Reynolds is considered to satisfy this limitation since indicator assembly 20a, b is located on the inside of the housing and indicator 40

Art Unit: 2875

therefore, not seen from the outside of the outer surface of the housing at least when deactivated.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANABEL M. TON whose telephone number is (571)272-2382. The examiner can normally be reached on 08:00-16:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
